# Overview

■ Typical applications .....	06
■ Features & Benefits .....	07
■ Range overview .....	08
■ Ordering information .....	12
■ Layouts .....	14
■ General technical characteristics .....	16

## Typical applications

Off-Road - Pavers

Robotics - Machine Tools

Telecom Military

Water Measurement

Aircraft

Oil & Gaz Industries

## Features & Benefits

### QUALIFIED

#### MIL-DTL-26482H

Fully in accordance with the MIL spec requirements with solder type.

### ROBUSTNESS

#### 500 Mating Cycles

Equipped with a coupling ring made from high strength aluminum. The plug provides a minimum of 500 mating unmating cycles. The receptacle is equipped with rugged stainless steel bayonet pins.

### OUTDOOR USING

#### Salt Spray 500 Hours

Designed to withstand climate ingress and exposure to salt spray or corrosive atmospheres while still maintaining mechanical, electrical functionality and RoHS compliance.

### QUICK MATING

#### 1/3 Bayonet Coupling

With only 1/3 twist of the bayonet coupling system, connectors are mated with audible "click" and tactile feel to confirm proper mating. These mating features eliminate uncertainty connection and reduce time and labor during installation.

### FLEXIBILITY

#### Arrangements from 2 to 61 contacts

Power supply and signal transmission can be combined in a unique interconnect solution to reduce system complexity and minimize component/installation costs.

## Environmental versions

## Technical features

### Materials

- **Shell:**  
Environmental version : aluminium alloy  
- Plating :  
- olive green cadmium  
- black anodised  
- black zinc nickel  
- nickel
- **Backshells:** Aluminum alloy
- **Cable glands:** Thermoplastic
- **Coupling ring:** Aluminum alloy
- **Spring washer:** Spring stainless steel
- **Insert:** Elastomeric soft neoprene
- **RoHS compliant & conforms to the Chinese standard SJ/T1166-2006 (Chinese RoHS equivalent)**

### Electrical

- **Dielectric withstanding voltage:**  
- At standard pressure: mated and unmated connectors  
- 1500 Vrms between size 20 contacts (service 1)  
- 2300 Vrms between size 16 contacts (service 2)  
- 1500 Vrms between mixed size 20 and 16 contacts (service 1)

- At reduced pressure 10 mbar:  
connectors mated and unmated  
- 200 Vrms between size 20 contacts (service 1)  
- 300 Vrms between size 16 contacts (service 2)
- **Insulation resistance**  
≥ 5000 MΩ under 500 Vcc
- **Current rating per contact**  
- Standard version:  
Size 20 = 7.5 A / Size 16 = 13 A  
- Hermetic version:  
Size 20 = 5 A / Size 16 = 10 A
- **Contact resistance**  
- Environmental version:  
Size 20 ≤ 4 mΩ / Size 16 ≤ 3 mΩ  
- Hermetic version:  
Size 20 ≤ 30 mΩ / Size 16 ≤ 14 mΩ
- **Shielding effectiveness:**  
70 dB to 5 MHz - 40 dB to 100 MHz

### Environmental

- **Operating temperature:**  
from -55°C to +125°C
- **Flammability rating:**  
UL94 HB
- **Dynamic salt spray:**  
per EIA-364-26  
- 48 h nickel, zinc cobalt, zinc nickel  
- 500 h black anodized version  
- 500 h black zinc nickel version

- **Sealing:**  
- Globally IP65 (unmated conditions)  
- With J or JC backshell IP67 (mated conditions)  
- With cable gland IP68 (mated conditions)  
Under 10 meter of water during 48 hours  
- Crimp contact version, 1 bar differential pressure, leakage ≤ 8 cm<sup>3</sup>/hr  
- Solder contact version, 2 bar differential pressure, leakage ≤ 16 cm<sup>3</sup>/hr
- **Fluid resistance:**  
- to MIL-DTL-26482G series 1 and NFC 93422 - HE 301 B code A  
- Hydraulic fluids  
- Lubricating oil

### Mechanical

- **Durability:**  
500 matings and unmatings per MIL-DTL-26482H
- **Vibration resistance:**  
10-2000 Hz, acceleration 15 g test procedure per EIA-364-28
- **Thermal shock:**  
5 cycles, 30 min. from -55°C to 125°C per EIA-364-32
- **Mechanical shock:**  
50 g, 11 ms period per EIA-364-27

## Hermetic versions

## Technical features

### Materials

- **Shell:**  
Steel
- **Plating:**  
Iridescent yellow cadmium  
Nickel
- **Contact:**  
Gold plated ferrous alloy
- **Seal:**  
Fluorocarbon elastomer

### Electrical

- **Max current rating per contact:**

<b>Contact size</b>	<b>20</b>	<b>16</b>
<b>Rating (A)</b>	5	10

- **Dielectric withstanding voltage:**

<b>Service</b>	<b>Standard pressure</b>	<b>10 mbar pressure</b>
I	1 500 Vrms	200 Vrms
II	2 300 Vrms	300 Vrms

- **Contact resistance:**

Size 20  $\leq$  30 m $\Omega$   
Size 16  $\leq$  14 m $\Omega$

- **Shielding:**

70 dB to 5 MHz  
40 dB to 100 MHz

### Environmental

- **Operating temperature:**  
-55°C to +125°C
- **Hermeticity:**  
1 bar differential pressure,  
leakage  $\leq$  2.8 mm<sup>3</sup>/hr
- **Salt spray:**  
48 hours min
- **Chemical resistance:**  
To MIL-DTL-26482G Series I
- **Damp heat:** 21 days

- 44 nickel plating
- 38 nickel plating for backshell for screen termination
- 42 olive green cadmium plating

## Push-pull locking plug

### General characteristics

- Locking: by pushing on the coupling nut
- Unlocking: by pulling a lanyard
- Mounted: on all 851 receptacles
- Layouts and crimp solder contacts: (see pages 14 & 15)
- cable gainé noir longueur déroulée 106 mm (for other length, consult us)
- Other characteristics: (see page 16)

## 8F51 filter connectors

### General information

These connectors are derived from standard specifications  
MIL-DTL-26482 G series 1 - NFC 93422 (HE 301 B) - VG 95328.

They are intermountable and intermateable with standard connectors.

Different types of filters may be fitted in these connectors to eliminate RFI/EMI in different frequency ranges.

Using built-in High Performance EMI filters offers the following advantages :

- Efficient filtering on interferences at electronic equipment input or output,

- Case screen-shielding efficiency is maintained,
- Cost and volume saving as compared with the use of discrete filters wired down the line,
- 4 types of standard filters are available - Please consult us for other capacitance and filter types,
- Combinations of mixed filter in the same layout: filtered, non-filtered and grounded contacts available.

An adaptor version is also a simple technique to equip existing systems which do not incorporate filters.

### Electrical characteristics

- Max. current rating per contact: 7.5 A (#20), 13 A (#16)
- Max. operating voltage: 200 Vdc, 120 Vac
- Standard filter types: C, Pi
- Capacitance range: typically 500 pF - 200 nF
- Filter performance: up to -60dB / -80dB

For this product, consult our FILTER CONNECTOR department.

## SNC specific connectors and connection accessories

### General information

These connectors are derived from standard specifications

8500-38A

Part number #16

8500-36A

### Strap backshell

Part number

8490-04

## Stripping instructions

- This operation should be carried out with great care. Use stripping pliers which are in good condition and which are designed for use with the size of wire being stripped.
- In order to maintain the connector's excellent sealing characteristics and, at the same time, meet the highest cabling standards the wires should have the following external sheath dimensions :

Contacts size	Ø over sheath	
	min.	max.
20	1.20	2.11
16	1.60	2.80

- Recommended loading:
  - 050 % with max. diam. wires
  - 050 % with min. diam. wires
  - 100 % with medium size wires.
- Size 20 contacts for cables:
  - when Ø over insulation ≤ 2 mm strip to a 4.5 mm length
  - when Ø over insulation > 2 mm strip to a 7 mm length.
- Size 16 contacts, strip the cable to a length of 6 mm.

## Cable-contact assembly

- Insert the wire into the crimp barrel and ensure that it has penetrated correctly by checking that it may be seen through the lateral hole in the barrel.

## Reducing sleeve

- If a wire with a cross sectional area of less than 0.21 mm<sup>2</sup> is used with a size 20 contact, it will be necessary to use a reducing sleeve: ref. 8500-781.
- Wires of cross sectional area of 0.6 mm<sup>2</sup> may be used with size 16 contacts by using a reducing sleeve, ref. 8500-1985.

## Crimping instructions

- With crimping pliers MS 22520/1-01 SOURIAU part number 8365 and turret MS 22520/1-02 8365-02:
  - «red» position for size 20 contacts
  - «blue» position for size 16 contacts.
- With crimping pliers MS 22520/2-01 SOURIAU part number 8476-01 and locator MS 22520/2-02 8476-02:
  - for size 20 contacts only.

Note : not be used with reducing sleeve.

Squeeze pliers firmly until a click is heard, the pliers should spring open when the ratched mechanism is released.

- Hold indenter side up-insert the wire-contact assembly or wire-reducing sleeve-contact assembly between the four indentors, ensuring that the contact bottoms in the locator.
- Fully close the jaws, once the contact is crimped the pliers must spring open remove wire + crimped contact, check crimp aspect.

## Crimp contact insertion

First disassemble and slide connector rear accessory over cables.

### Insertion tools

- Pliers 8500-29B.
- Except 8-2, 8-3, 8-4, 12-14 contact layouts: tool 8500-93B

### Use of insertion tools

Manually insert the contact into the desired insert cavity.

- Insert the wire between the pliers jaws, the tip of the jaws butting the contact shoulder.
- Introduce contacts one by one in insert cavities pushing straight in until the contact snaps into position and the clip ensures contact retention.

### Filler plugs

Where certain contacts are unwired and where it is necessary to fully maintain the connector's sealing characteristics, a filler plug must be used. Note that the contact must be inserted before the filler plug.

## Crimp contact extraction

All contacts for use in insulators with clips are extracted using a semi-automatic tool:

- size 20 contacts: tool type 8500-36A
- size 16 contacts: tool type 8500-38A.

First disassemble and slide connector rear accessory over cables.

- Do not operate the tool slide button.
- Bring the tool tip over the male or female contact to be removed from connector front (mating face) as far as the first mark for male contacts and the second mark for female contacts.

- This operation, should be carried out delicately in a direction parallel to the contact centre line with a light turning action.
- Extract contact pushing the slide button fully forward, carefully remove tool and pull wire to release the wire-contact assembly.

Note : tools have an adjustable spring system (rear knurled knob) also for automatic contact disengagement.

## Cross reference list
